---

“Hello, World!” My name is Cassie. I’m an optimistic, flourishing Software Developer with a focus in Frontend Development and a former background in **Healthcare!** My background in healthcare has honed my proficiency in **problem-solving, managing projects and a passion for innovation!**

I’m PROUD to bring a **bright** and **positive energy** to any team!

### SKILLS

Languages - **JavaScript (Typescript)**, Python, Node.js, SQL, JSON, HTML, CSS

Database - PostgreSQL, MongoDB

Libraries and Frameworks - **React**, Express.js, Mongoose, Django, JQuery, Bootstrap

Other - **RESTful Routing**, JSON api, CRUD, Git, **GitHub**

Interpersonal Skills - Highly collaborative, strategic problem solver, strong written and verbal communicator.

### SOFTWARE DEVELOPMENT PROJECTS

**Healthy Minds** | Python, Postgres, Django, **React**, **Typescript**, Redux & Chart.js

4/2023

A full stack mental health application that allows users to document their mood at their leisure.

- Integrated **authentication** via Django Rest to build a **secure model-backend API**.
- **Calculated** users’ overall mood based on a **4-point scale** and displayed overall mood trends using **Chart.js**.
- Utilized **Trello** as a tool for monitoring my tasks, tracking meeting deliverables, and managing my time efficiently.

**Cardify** | Python, Postgres, Django, & React

4/2023

A full stack study application that uses flashcards to help individuals study.

- **Collaborated** with a team of **3**; fostered positive relationships with team members while facilitating team meetings, brainstorming ideas while ensuring everyone’s opinions were heard.
- Utilized **React Router** to implement **client side routing** for a seamless and dynamic application with significant mobility.
- Established and implemented a **one-to-many relationship** using two models to assign cards to their specific deck.
- Made **RESTful API** calls to access and use **data** from the backend invoking all create, read, update, delete (**CRUD**) operations.

**Social Site** | Javascript (Node.js), MongoDB, Express & React

4/2023

A full stack social media application using **MERN** where users can create profiles, post updates, and view others’ profiles.

- Partnered with another developer to develop this app in a **1-week sprint**.
- Utilized **React Router** for the front-end of the application, which created a **fast** and **efficient**, multi-page application for a **better user experience**.
- Designed a visually appealing and user friendly application using **HTML & CSS**.

### EDUCATION

**General Assembly** | Remote

*Software Engineering Immersive*

2/2023 - 05/2023

Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies.

**Free Code Camp** | Remote

*Web Development*

12/2023 - 2/2023

Completed self-learning web development courses that focused on the basics of web development.

## **PAST WORK EXPERIENCE**

Registered Medical Assistant/SMA Project Coordinator | Palo Alto Medical Foundation- **Sutter Health** 7/2018 - 3/2023

- Supported a **cross-functional team** by performing detail-oriented administrative and clinical tasks, including taking vital signs, recording medical histories, preparing patients for exams, collecting lab specimens, and administering medications.
- **Founded** and promoted to the Resource Lead role, which was later **expanded to 3 additional teams in the department**. Identified areas for improvement, implementing new workflows that **increase productivity, patient experience and reduced medical errors**.
- **Trained and assisted 4+ medical assistants** in best practices daily while implementing *Sutter Health's standards*.
- Voluntarily organized and led re-engagement and educational sessions each month for 50 high-risk non compliant patients, which **increased targeted patient return rate by 100%**, guaranteeing they'll receive the recommended healthcare.
